

Minutes of Meeting

Dated: 11/08/2023

Attendees Denso: Sumit San

Attendees SATO: Dipak Pathak

Motive: Washing MC Traceability Application Overview after Second Phase Demo.

Development Points:

1. Suspected lot details data report will be separate by different pages.
2. In Suspected lot data page, show button text should be change to NG Lot Show and another button added for backward traceability.
3. In backward traceability page will show the lot summary of suspected lot and where user can enter the any rejection data.
4. After that user will click on Back Trace data button then all serial which is belong to that range will be display.
5. Font size need to be increase. (This is the fix template for Denso for all application but will try to develop another template separately).

Conclusion: We will provide you these changes till next meeting for final feedback.
